a Records are clonal
81 of 2,908 events
hold half of all records
mean 11 nuclei
per event (SE 0.2)
fraction of events
at least this large
nuclei carrying one writing event
b Depth saturates
150 founders
300 founders
600 founders
markers: beyond here, more
nuclei stop helping
standard error of the mark rate
recovered arrays sequenced per culture
c Cultures do
no test
possible
150 founders
600 founders
1.33-fold
smallest detectable fold change
in mark rate
cultures per arm
